

Professor Anil Chuturgoon is a distinguished South African academic leader and biomedical scientist who currently serves as Acting Deputy Vice-Chancellor: Research and Innovation at the University of KwaZulu-Natal. An NRF B-rated researcher, he has published more than 230 peer-reviewed articles, 12 book chapters and 2 edited books. His research focuses on toxicology, epigenetics, mitochondrial dysfunction, and environmental health, with particular recognition for pioneering work on the epigenetic effects of food-borne mycotoxins. He has supervised many postgraduate students; and has served on several editorial boards, including Nature and Frontiers journals. He is widely regarded as a leading voice in biomedical research and higher education leadership in South Africa.
